WHITE ELECTRONIC DESIGNS

Product Change Notification

Date: Monday, March 8, 2010
PCN#: 140A00184
Subject: Revision/correction to Product Change Notification # 140A0184

Dear Customer,

In an effort to better communicate to you, our user community, we have implemented a e-mail version for our PCN process in addition to our PCN website. While you may receive a notification from us concerning a particular part or part numbers, it is not an indication that you use or have ordered these particular parts, but merely a communication to notify our user community as a whole. Please review your sales orders, POs, records, etc. to determine if this particular PCN impacts your activities or affects your business.

White Electronic Designs Corporation wishes to inform you of a data sheet correction for the following product: W3H32M64E-XSBX . An error to the functional block diagram in Revision 6, October 2008 to the data sheet changed the part from 2 ranks to 1 rank in the layout of the memory. The error was corrected in Revision 9, August 2009 of the data sheet. If your design was done using Revision 6 through Revision 8 of the data sheet, you will only have access to half the memory. To address this issue, we have created a new part number which is a 1 rank memory block. The part number is W3H32M64EA-XSBX. This part will be available in April of 2010. The new data sheet will be available March 5, 2010 on WEDC's website.

As technology moves at a much faster pace, advanced embedded electronic components play a more strategic role. Constant changes and advancements in technology mandate that we anticipate changes and directions in technology for the benefit of our customers. As one of the pioneers in advanced semiconductor packaging and high-density memory solutions, we stand ready to assist you in managing this evolution of technology. If we can provide any additional assistance, please contact us at 602.437.1520 or complete a contact form at www.whiteedc.com/contact_us.html.

Best regards,
 White Electronic Designs Corp
