

Termination for ST25R3911

Main reason for the Termination:

The strategy of STMicroelectronics Memory Division is to support our customers on a long-term basis with best possible lead and reaction times. Therefore, the ST25R series was transferred to ST ownership as announced in PCN MDG1710400.

As the **ST25R3911** is not meeting new application requirements anymore and already succeeded by ST253911B, the part will not be transferred. The **ST25R3911B** is the pin compatible replacement with improved performance, errata fixes and is with minor software adjustments fully compatible to ST25R3911.

Affected Commercial Part Number	Replacement Product
ST25R3911-BQFT	ST25R3911B-AQFT

PRODUCT TERMINATION NOTICE

Date: May 18, 2018

Dear valued customer,

STMicroelectronics is considering terminating the production of the ST25R3911-BQFT product.

We propose to meet you as soon as possible, in order to evaluate the consequences that our plans might have for you. During this meeting we could define in common the best possible solution in order to minimize the impact of any decision. Any objection to our proposal should be raised 10 days at the latest from the date of the present note.

Planned date of Termination:

Last order entry: **May 1st, 2019**

Last shipments: **November 1st, 2019**

Please be assured that STMicroelectronics remains committed to excellent customer service. We are prepared to take all the necessary steps to reduce any inconvenience resulting from this situation.

Yours faithfully,

Termination for ST25R3909
