[Notice 25-06] Addition of Humidity Indicator Card for IC Package Products

We would like to express our sincere appreciation for your continued business and support.

We would like to hereby inform that we will begin including a Humidity Indicator Card (HIC) inside the aluminum moisture-proof bags for IC package products.

Until now, a HIC has not been included, as we have been using silica gel with similar functionality (which changes color based on moisture absorption).

However, we have decided to enclose a HIC as part of our standard packing specification, due to an increasing number of customer requests.

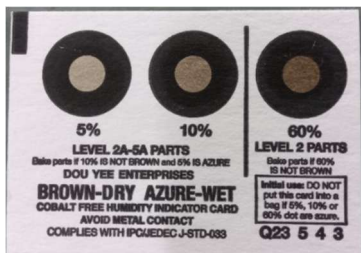

Your understanding and cooperation will be highly appreciated.

◆ Applicable products: Please refer to the attached list.

◆ Details of Change

Before: No HIC included

After: HIC included inside the aluminum moisture-proof bag

HIC photo		Remarks
Dry condition 	Wet condition 50%, 12h 	✓ Compliant with JEDEC standards. ✓ Cobalt-free type that does not contain cobalt chloride. ✓ Brown when dry. ✓ Turns azure under humid condition.

◆ Schedule: Start from December 2025 onwards

Shipping schedule might vary depending on ordered quantities or inventory conditions. Details will be informed by our sales representatives separately.

If you have any inquiries, please contact our sales representatives by August 31st.

Sincerely yours,
SEIKO EPSON CORPORATION
