Discontinuation of MAS6240C and D, MAS6180B and C and MAS6181B products

Dear customer,

We regret to inform you that MAS must discontinue the supply of MAS6240C, MAS6240D, MAS6180B, MAS6180C and MAS6181B products. The reason for this is the discontinuation of the semiconductor process used for the production of these products. Due to the capacity allocation we can unfortunately accept EOL orders to placed only in next 3 months, latest by end of March 2023. Deliveries of these orders is planned to take place before end of 2023 but it is subject to our order confirmation.

We will offer new products that will be fully pin and functionally compatible with the old products. For some of the products we already can supply engineering samples and for others in early 2023. Volume production is planned so that it will allow smooth transition to the new product.

We are very sorry for the inconvenience caused by the EOL of these products but having the new products produced with more modern process technology will improve products' availability and competitiveness on the long term.

If you have any questions do not hesitate to contact us.

Sincerely yours,
