[Notice] Change of IC packaging factory due to our factory transition

We would like to express our sincere appreciation for your continuous business relationship and support.

We would like to hereby inform that we will change IC packaging factory of the applicable products as mentioned below. The background of this change is that we decided to transfer the semiconductor production at Singapore Epson Industrial Pte. Ltd. (SEP) to another affiliated factory in June 2026.

SEP has been processing the packaging manufacturing, final testing and shipping of our packaging products however, environment surrounding the manufacturing industry in Singapore is quite tough recently, and we have been facing the difficulties such as securing of human resources. Consequently, from a management perspective, we have decided to close the semiconductor back-end process at SEP.

To ensure a smooth transition of our production, we have decided to transfer the packaging manufacturing to ASE Chung-Li (ASECL), a long-term outsourcing partner. The final test and shipping site will be transferred to our affiliated factory for better quality control.

We apologize for our sudden notice and any inconvenience, but your understanding and cooperation will be highly appreciated.

- ◆ Applicable products: S1D13715B00B200
S1D13719B00B100

- ◆ Production Site:
