

Customer Information

14.01.2009

Subject:

For shipment in tape & reel, the tape material will be changed.

Products Affected:

Products shipped in tape & reel. Part number list is attached.

Document release Nr.: FME QA-2009-001

1. Background

Carbon contained in tape is a major root cause for foreign materials which may fall down on IC parts and cause failure. In the new introduced tape material, conductive carbon is excluded.

2. Description

The tape stays with botanical material as it is, however the conductive carbon content is to be excluded.

Should you need a certificate of RoHS compliance (ICP data) or MSDS of the new tape, please contact us.

The tape dimension will not change; while the tape colour tone will change slightly from dark black to light black.

Our judgement is that the new type tape can be handled in the same way as the current tape.

3. Introduction Schedule

End of May, 2009

Here below you can find the information to contact us for any further information you need:

Originator:

Name:	<u>Jing Ren</u>
Function:	<u>Quality Engineer</u>
Address:	<u>Pittlerstr 47, 63225 Langen, Germany</u>
Phone/Fax:	<u>+49(0)6103690137 / 337</u>
