[Notice] Termination of creating new masks for MCU

We would like to express our sincere appreciation for your continuous business relationship and support.

We would like to inform you that we will terminate of creating new masks for the applicable products by March 31st, 2026. We will continue to accept your repeat mass production order unless you are notified of the individual discontinuation.

1.Applicable products

- All of our MCU products equipped with mask ROM.
- Some products equipped with flash memory that allows specification changes (mask option) using masks.

*Please refer to the attached lists in detail.

2.Details

Termination of receiving orders to **create new masks** (changing mask ROM data or mask options)

*For orders that do not involve the creation of new masks, we will continue to accept your order unless you are notified of the individual discontinuation.

3.Reason

We judged it was difficult to continue this service, due to deterioration of the mask data creation device and decrease in demand for MCUs equipped with mask ROM.

4.Alternative models

Please refer to our website, catalogs and manuals for details. Our sales representatives will propose alternative solutions if you need any supports.

Our MCU website: https://global.epson.com/products_and_drivers/semicon/products/micro_controller/

5.Schedule

Last request date: March 31, 2026

6.Requests

Please confirm the necessity of a final order and place an order by the above due date if necessary.

Appendix-1

Applicable models (Uhrenfabrik Junghans GmbH & Co. KG)

Model	Status
S1C63Y04	Custom

Appendix-2

Applicable models (General models)

	Models	Status* ¹
1	S1C17121	Non promotive model
2	S1C17153	Mass production model
3	S1C60A08	Non promotive model
