PRODUCT DISCONTINUANCE NOTIFICATION (PDN)

PDN2020-13

END OF LIFE (EOL) – LAST TIME BUY (LTB) OF DA9053 PRODUCT FAMILY

PUBLISH DATE: DECEMBER 23, 2020

LAST ORDER DATE: June 30th 2021 LAST SHIPMENT DATE: Dec 31st 2021

Dear Customer,

Dialog Semiconductor wishes to advise you that the devices listed in the Affected Parts List below are now subject to EOL:

The DA9053, and DA9053-A automotive variant, is a legacy device manufactured using a tester platform which is nearing end of life and Dialog has been informed by the manufacturer that this tester will become obsolete by the end of 2021. Dialog will therefore discontinue the DA9053 and offer customers the opportunity to place last time buys (LTB). Dialog has a portfolio of similar PMIC's and can assist customers with selecting a suitable alternative.

The LAST ORDER DATE allows you to place end-of-life orders until the specified date.

After this date no further orders will be accepted.

The LAST SHIPMENT DATE is the latest date Dialog Semiconductor will ship parts listed below.

After this date no further shipments will be possible.

Affected Parts List

Part number		
Both automotive and non automotive variants of the DA9053-XX and DA9053-XX-A, where XX is the unique OTP option allocated to a particular customer		

We thank you for your attention to this matter. Should you have any questions, please do not hesitate to contact your local Dialog contact or authorised distributor.

Sincerely,

DIALOG SEMICONDUCTOR

Please refer to Dialog longevity program and obsolescence policy.
